DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 32 and 33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase "said third segments" is indefinite as it lacks clear antecedent basis.

Presumably claim 32 should depend from claim 31.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 10, 24-26, 35-37, 44-48 and 50-53 are rejected under 35 U.S.C. 102(b) as being anticipated by Hursh et al. (4615188).

The disclosure of Hursh et al. (4615188) teaches the sleeve for receiving elongated items including a flexible first tubular (16) segment having opposite ends and comprising first filamentary members interlaced together; and a flexible second tubular (17) segment having opposite ends and comprising second filamentary members interlaced together, said second

Art Unit: 3765

filamentary members being different from said first (hydrophobic and hydrophilic), one end of said first segment being joined to one end of said second segment (figure 4), said second segment being reverse folded and drawn coaxially within said first segment to form inner and outer adjacent layers surrounding a central space, reverse fold defining one end of said sleeve segment having filamentary members. Note the toe closures 16a and 17a are welted via linking. Re claim 48, note the different knit parameters for 16 and 17 namely pile loops and non-pile loops.

Allowable Subject Matter

Claims 6-9, 11-23, 27-31, 34, 38-43, 49 and 54 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 32 and 33 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
